## DR. CHAUSSEE'S NEWS

### Gallup Survey

In 2016 students in grades 5-12 participated in the Gallup survey to check engagement, contentment, etc. with our school district. The results of the student survey are in the tables below. The student survey, as can be seen, asks questions covering four areas: hope, engagement, entrepreneurial aspiration, and career and financial literacy. The charts show the district average of the 25 elementary schools and Abbott's scores. Here is a brief description of each of the categories:

**Hope-** The ideas and energy we have for the future, drives effort, academic achievement, credits earned, and retention of students of all ages.

**Engagement-** The involvement in and enthusiasm for school, reflects how well students are known and how often they get to do what they do best.

**Entrepreneurial Aspiration-** the talent and energy necessary to build businesses that survive, thrive and employ others

**Financial/Career Literacy -** the information, attitudes and behaviors that students need for healthy participation in the economy

Two years ago was the last year for the well being section of the survey. This was replaced by entrepreneurial aspiration and career/financial literacy. More on these topics later.
